

Mycotoxins ring test 2021

Purely naturally contaminated samples

Mycotoxins ring test third edition. The purpose of this collaborative test is the evaluation of the participants' performance using their routine methods for the analysis of mycotoxins of interest. Mycotoxins ring test is based on the principles of ISO / IEC 17043. Homogeneity and stability tests of samples are performed accordingly with Annex B, and robust statistics are performed accordingly with Annex C in the standard ISO 13528.

Distribution: 1 to 3 naturally contaminated samples of 200 g per distribution.

Participation is kept confidential.
